

HARSH DADHICH

Tracy, CA | me@harshdadhich.com | (209) XXX-XXXX | harshdadhich.com | [in hdadhich01](https://www.linkedin.com/in/hdadhich01) | [github hdadhich01](https://github.com/hdadhich01)

EDUCATION

University of California, Los Angeles

Sep 2025 – Exp 2026

Master of Engineering in Data Science

Los Angeles, CA

- **Coursework:** Distributed Databases, Reinforcement Learning, Product Management, NLP

University of California, Santa Cruz

Sep 2022 – Jun 2025

Bachelor of Science in Computer Science

Santa Cruz, CA

- **Involvement:** Google DSC, GitHub Ambassador, Delta Sigma Pi – **Awards:** Dean's Honors, Chancellor's Internship
- **Coursework:** Data Structures & Algorithms, Computer Systems & Architecture, Applied Machine Learning, Functional Prog, Computer Networks, Web Applications, Probability, Discrete Math, Linear Algebra

SKILLS

Languages: Python, Go, C++, TypeScript, Bash, SQL, HTML/CSS, $\LaTeX$

Frameworks & Tools: Django, FastAPI, Flask, BeautifulSoup; PyTorch, Scikit, Pandas; React.js, Next.js, Tailwind; Git

Cloud & DB: AWS (EC2, Lambda, EBS, DynamoDB, S3), Google Cloud, Cloudflare (Workers, R2), Docker, Linux (Debian), Terraform, Packer, Jenkins, GitLab CI, GitHub Actions; PostgreSQL, Chroma

Concepts: Product Design, Networking (TCP/IP, DNS, HTTPS), RAG, Agents

WORK EXPERIENCE

Dento AI | Software Engineer Intern

Jan 2025 – Jun 2025

SF-based startup bringing AI into dental consultations

San Francisco, CA

- Optimized consultation transcription latency by **35%** with client-side audio streaming, achieving speeds $\leq 5s$
- Achieved a **22x** speedup with multi-threaded transcription processing through **Deepgram** of ~10MB audio files
- Implemented a schema + database partitioning script in **Django with SQL**, cutting query latency by **40%**

Intuitive Surgical | DevOps Engineer Intern

Jun 2024 – Sep 2024

Surgical robotics manufacturer; under the Cloud Operations Team

Sunnyvale, CA

- Built reusable **Terraform** modules reducing setup time by **~90%** for AWS infra in multi-region environments
- Migrated **CI/CD** from Groovy (legacy) to GitLab CI, centralizing development and deployment for product teams
- Liaised with Product Security team individually to optimize deployment pipeline; automated **7** manual steps within

CITRIS and the Banatao Institute | Data Scientist Intern

May 2024 – Jul 2024

UC-wide research partnership; host company: Beyond the Arc

Berkeley, CA

- Created a text mining pipeline using OpenAI's Assistants API, with **~92%** accuracy for content **classification**
- Accelerated regulatory document processing by **40%** by parallelizing scraping and optimizing end-user workflow

UCSC Genomics Institute | Research Assistant

Apr 2024 – Dec 2024

Experiments with neural organoid data; under Dr. Mircea Teodorescu

Santa Cruz, CA

- Mentored by postdocs to use **matplotlib**, and **numpy** to assist in software experiments simulating cellular readings
- Validated spike detection accuracy to flag clusters with **~95%** precision; more at [brainengineers/MEArc](https://github.com/brainengineers/MEArc)
- Formulated a framework for AI agents to execute IoT-based wet lab experiments remotely with low latency

PROJECTS

spout.sh – Remote viewing for long-running terminal jobs | Go, HTMX, Cloudflare R2

April 2026

- Built a bash-native tool that streams terminal output to an AES-GCM **encrypted** web + mobile view
- Inspired by Claude Code Remote Control; built modes that stream data with **WebSockets** to an xterm.js dashboard
- Shipped 3 tiers for differing security + **LLM** watchdog (using lightweight models) for cheap, real-time, smart alerts

[Movie Revenue Predictor – Neural Network Model Training](#) | TensorFlow, Keras, Pandas

June 2024

- Built a movie revenue predictor beating existing models' accuracies by **~28%** using feed-forward networks
- Engineered features (director success, actor frequency) and robust data preprocessing pipeline for 5k+ movies

[SlugTools](#) – University Data API & [round-nutrition](#) – PyPI package | BeautifulSoup, Flask

July 2022

- Built SlugTools, a **REST API** scraping UCSC dining, enrollment, RateMyProfessor, and location occupancy data
- Scheduled smart periodic **scraping** via cron jobs on a VPS; managed DNS with Cloudflare for slug.tools
- Also built round-nutrition, a zero-dependency, **sub-ms** FDA-compliant nutrition rounder earning **20k+ downloads**
